

Second International Advanced Course

# Public Communication & Applied Ethics of Nanobiotechnology

23 - 28 September 2007, St Edmund Hall, Oxford, UK

**An intensive training course for all those working in nanobiotechnology with an interest in its public communication and ethical implications.**

The course consists of an alternating programme of expert lectures, case studies, media training, role play, group discussions and debate.

Course participants will acquire:

- knowledge of the relevant ethical, legal and social aspects of nanobiotechnology
- skills to communicate effectively with the media and the public
- understanding of issues involved in public awareness and perceptions of nanobiotechnology

**For further information please see [www.nanobio-raise.org](http://www.nanobio-raise.org)**

This course is organised by Nanobio-RAISE, a European Co-ordination Action bringing together nanobiotechnologists, ethicists and communication specialists with the aim of anticipating the societal and ethical issues likely to arise as nanobiotechnologies develop.
